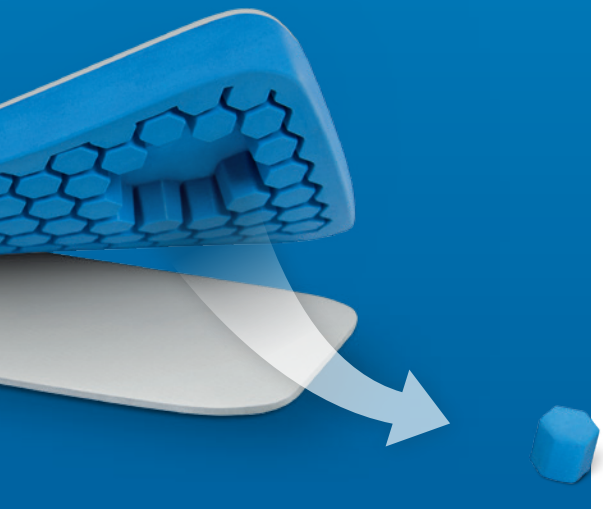
PegContour® Insole
Off-loading Cushion Insole

The effective, three-dimensional insole system for full pressure distribution as well as optional selective off-loading

> optimal pressure redistribution through its transverse arch and medial and lateral longitudinal arch
> targeted off-loading by removing individual pegs
> right and left version available



DARCO Quality Since 1985

DARCO

PegContour® Insole

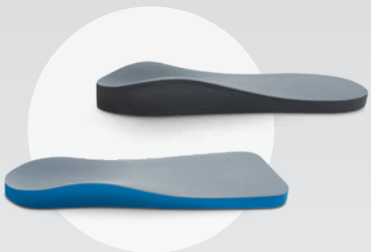
with two different sole shapes

INDICATIONS
> for use after hallux valgus and small toe surgeries (Austin, Akin, Scarf, Weil, Hohmann, etc.)
> talipes valgus, flat foot, splayfoot
> angioneuropathic changes of the foot in combination with mild foot deformities

PURPOSE
> effective insole system for plantar pressure relief in acute care
> pressure can be reduced by up to 55 %
> optimal pressure redistribution is achieved through the contours

FEATURES
> soft lengthwise and crosswise sole covering made of functional polyester
> customisable PU material
> customised fit through the removal of single pegs
> available for the right and left foot

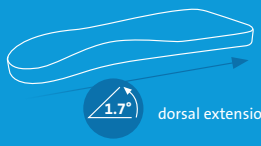
Removal of individual pegs enables a customised fit – postoperatively or for acute wound care.



After the pegs have been removed from the area that needs relief (Figure 1 + 2), the sole base supplied is affixed to the entire sole surface (Figure 3). A thin layer of EVA (sole base) stabilises the off-loading area, and keeps the remaining pegs in place.

The 15 mm high PegContour® Insole, made from 100 % PU material, provides a high level of wearing comfort with the lengthwise and crosswise stretchable sole covering.

The negative heel produces dorsal extension of 1.7°. This is why the pegs in the rearfoot area cannot be removed.



The pegs can also be removed for optimal off-loading in the rearfoot area.

ADDITIONAL INDICATIONS
for the blue sole

For selective off-loading for:
> plantar lesions in the forefoot or midfoot area
> plantar ulcers/ulcer prevention in the forefoot or midfoot area
> pressure points in the forefoot or midfoot area

ADDITIONAL INDICATIONS
for the black sole

> heel wounds
> heel spurs (plantar fasciitis)
> healing of ulcers in the heel area (rearfoot ulcers)
> postoperative use and treatment of the heel

Fits for

Relief Dual®
Off-loading Shoe

MedSurg
Healing Shoe
